Comprising:

## **Sunbliss 08 Turbine Tanning unit**

The Sunbliss 08 Portable Turbine & Gun system is a very compact yet powerful turbine unit that is a little larger than the small compressors. yet very lightweight and portable. The spray pattern of the turbine gun differs from the airbrush. The turbine forces a rapidly moving large volume of air into a sophisticated gun that in turn atomizes the solution on to the skin in a perfectly patterned fine mist reducing overspray. The broad spray pattern and even application means a complete body spray can be completed in under 10 minutes.

The Sunbliss 08 represents the next generation in tanning systems offering a number of advantages over conventional airbrush systems;

Simple to set up

Straight forward to use

Fast application, (5 - 10 minutes)

Adjustable spray width for improved coverage

Easy to clean

Limited overspray.

## **Also included:**
